EIBA 2000 Conference
Full Text Search

The first time you want to perform a search you have to tell Acrobat Reader where the Index file is. Select : Edit - Search - Select Indexes from the menu bar in the Reader. Then select Add in the pop-up window and navigate to the "Eiba" directory on your CD-drive. Here you should select the "index.pdx" file. You now check the "Eiba 2000 Full Text Index" and un-check the "Acrobat 4.0 Online Guide" if applicable. You can now perform Full Text searches on all articles on the EIBA 2000 CD-ROM, just use Edit - Search - Query or the appropriate buttons on the button bar. In case the search procedure is unclear please try the Help - Reader Guide, it is very useful.

- Problems with searching : if you are using your own version of Acrobat Reader please make sure you have installed the search plug-in, otherwise the full-text search options are not available

PS. You can conduct Full Text searches from anywhere in the EIBA 2000 CD-ROM so you do not have to return to this section after you have selected the EIBA 2000 Full Text Index.
